

Recommended Vaccination Schedule

Adult Traveling/Show Horses

<u>March-April:</u>	Sleeping Sickness Tetanus West Nile Virus Rabies Rhino/Influenza Strangles (optional)
<u>July-August:</u>	West Nile booster

Foals (from vaccinated mares)

<u>3-6 months of age:</u>	Sleeping Sickness Tetanus West Nile Virus Rhino/Flu
<u>6 months of age:</u>	Rabies

*Foals require a booster 4-6 weeks after the initial vaccine, then again at 10-12 months of age.

Recommended Deworming Schedule

Adults: March, September: Strongid
May: Quest
July, January: Anthelcide
November: Ivermectin + Praziquantel

Foals: Begin deworming at 2 months of age and rotate between Strongid and Ivermectin until they are 1 year of age; foals can then be included in the adult deworming schedule.

Please call us if you have any questions regarding the vaccination or deworming of your horse.
